

ICT EQUIPMENT PREVENTIVE MAINTENANCE CHECKLIST

Information

Document Number : {document_number}

Property Number : {property_number}

Issued to : {issued_to}

Computer Name : {computer_name}

Brand/Model : {brand_model}

MAC Address of Computer : {mac_address}

Serial Number : {serial_number}

Unit Location : {unit_location}

Assigned to (Actual User) : {assigned_to}

Monitor Brand/Model : {monitor_brand_model}

Monitor Serial Number : {monitor_serial_number}

Date of Last Maintenance : {date_last_maintenance}

Date of Maintenance : {date_maintenance}

Inspected by : {inspected_by}

General Maintenance	
{a}	Update Operating System
{b}	Delete browser history and cache files
{c}	Clean out Windows temporary Internet files
{d}	Check for patches and Windows updates
{e}	Configure startup programs
	Processor: {processor} Operating System: {operating_system} Office Version: {office_version} Primary Internet Browser: {primary_browser}

Security Maintenance

{f}	Run anti-malware/anti-virus in the operating System
{g}	Update the anti-virus software as needed
{h}	Confirm that backups are done by users
{i}	Create or update boot disk or emergency repair disk as needed
{j}	Advice users to change passwords
	ANTI-VIRUS: {antivirus}

Hardware Maintenance

{k}	Inspect computer hardware:
{l}	Check monitor for dead pixel
{m}	Check the keyboard and mouse
{n}	Check CPU case
{o}	Check all connections
{p}	Check CPU's cooling fans if working properly
{q}	Check power supply
{r}	Check power source
{s}	Check RAM if installed correctly
{t}	Check network hardware
{u}	Is the computer damaged or in need of repair? ? YES ? NO
	If yes, what damage(s) has been observed? {damage}
{v}	Re-seat all connections while the computer is open
{w}	Clean CD drives and USB Ports
{x}	Clean the keyboard and mouse

{y}	Check printers (test page) and scanners
{z}	Organize the cables
{a1}	Clean CPU case
	GPU: {gpu} RAM: {ram} Keyboard: {keyboard} Mouse: {mouse} Ups: {ups_brand_model} {ups_serial_number} Printer {printer_bran_model} {printer_serial_number}
Software Maintenance	
{a2}	Run disk cleanup in the Operating System
{a3}	Defragment the hard drive in Windows
{a4}	Empty the recycle bin
{a5}	Delete .tmp/.tilde files
{a6}	Delete old .zip files that were already unzipped
{a7}	Update drivers as needed
{a8}	Uninstall unnecessary programs
{a9}	Check hard drive space
{b1}	Check memory space
{b2}	Check network connectivity
{b3}	Reboot the system. (Record startup time: {startup_time})

Storage: {storage}
